SUMMARY

Dynamic Full Stack Developer / AI Developer with over 11 years of experience in designing, developing, and optimizing scalable web applications serving more than 1 million users across diverse industries. Expertise in React.js, Angular, Node.js, and Python enables the delivery of high-performance solutions that enhance system efficiency by up to 40%. A strong focus on building secure architectures and improving code quality ensures maintainability while leading cross-functional teams to complete projects 30% faster using agile methodologies. Committed to driving innovation and continuous improvement, consistently delivering exceptional user experiences through robust software solutions tailored to client needs.

SKILLS

Languages: Java, PHP, JavaScript, TypeScript, Python, C/C++, C#, QT, Kotlin, Swift, HTML5, CSS
Framework: React, Node.js, Angular, Laravel, Django, .NET, Spring Boot, FastAPI
Database: MySQL, PostgreSQL, MongoDB, SQL, NoSQL
Cloud & Tools: AWS, Kubernetes, Firebase, Apache Tomcat, Apache Kafka
Mobile Development: Android (Java, Kotlin), Flutter, React Native, iOS
AI: LLM, GPT, Llama, TensorFlow, pyTorch
Other: Design Patterns, Git, Scripting

PROFESSIONAL EXPERIENCE

Senior Full-stack AI Developer – TSS, Inc **10/ 2024 – Current**

- Transitioned into Full Stack AI Development, integrating AI models into React, TypeScript, and PostgreSQL-based applications.
- Built machine learning models and AI algorithms to enhance product features, leveraging tools such as Python, TensorFlow, and AWS AI services.
- Enhanced customer retention by 20% by developing personalized recommendation systems using machine learning.
- Achieved a 40% reduction in time-to-insight by automating data visualization processes using Python.
- Culture Builder: Fostered an environment of continuous learning toward delivering high-quality websites that resulted in a remarkable 30% increase in project completion speed.

Senior Software Engineer – DFPS JOBS Private Limited **10/2023 – 09/2024**

- Orchestrated the creation of scalable microservices utilizing Spring Boot, ASP.NET Core, and Hibernate, curtailing API response times by 35% and optimized system efficiency.
- Developed responsive web interfaces with React.js, Redux, and TypeScript, enhancing user experience and resulting in a 28% increase in conversion rates.
- Revamped RESTful APIs using Python and optimized SQL/T-SQL queries to elevate data infrastructure, consequently slashing database latency by 36% and improving application stability for end-users.
- Implemented a secure CI/CD pipeline using Maven, Jenkins, and GitHub Actions, automating

software delivery and reducing deployment time by 30%, while integrating automated security testing and vulnerability scans to ensure compliance and enhance system reliability.

- Supervised the implementation of automated testing frameworks and integrated code quality checks into the CI/CD pipeline, cutting Sev1/P1 incidents by 2 per quarter.
- Spearheaded the modernization of 10 legacy applications by migrating to a microservices architecture, improving scalability and maintainability while reducing technical debt.

Senior Software Engineer – Washington Workforce Association 01/2022 – 09/2023

- Developed and maintained internal workforce management tools using Java Spring Framework, ASP.NET MVC, and React.js, improving user satisfaction with 15% positive feedback.
- Refactored legacy components of distributed microservices into modern, modular architectures, improving API response time by 35%.
- Modernized data synchronization workflows with Informix, SQL Server, and T-SQL, cutting down data pipeline latency by 20% and enabling faster reporting for management tools.

Senior Full Stack Developer – Cigna Healthcare 12/2019 – 12/2021

- Implemented healthcare data platforms using ASP.NET Core and Spring Boot, achieving 32% reduction in data breaches.
- Built secure and efficient REST APIs for internal data services, handling 100+ API requests per day and improving data accessibility.
- Revamped database architecture and API communication protocols for patient record systems, raising data accuracy by 20%.

Software Engineer – T-Mobile 10/ 2017 – 11/2019

- Designed and maintained telecom service portals and customer data systems using React.js, ASP.NET MVC, and Spring Boot, resulting in a 23% increase in user engagement.
- Orchestrated the construction of 12+ modular Rest APIs utilizing Spring Boot, achieving a 99.99% API request success rate on mobile and web platforms.
- Pioneered a standardized Git branching strategy and enforced code reviews, directly resulting in zero rollback incidents.

Software Engineer – Fluke Corporation 01/2015 – 09/2017

- Programmed engineering applications for calibration systems, decreasing defect density by 45% and enabling successful communication with 500+ IoT devices while meeting strict regulatory requirements.
- Spearheaded the refactoring of core applications into modular Spring Boot services, increasing system uptime to 99.9% and leading the effort to resolve the top three performance bottlenecks.
- Integrated third-party APIs and ensured high performance for real-time monitoring systems.

Software Engineer – HPL Global Services Pvt.Ltd 07/2014 – 12/2014

- Architected front-end modules utilizing Angular, enhancing test coverage by 20% through implementation of unit and integration tests, and minimizing regressions in subsequent releases.
- Championed code quality initiatives, slashing defect density by 25% in software solutions delivered to 6 international clients, improving overall client satisfaction and system stability.

EDUCATION

Coleman University, San Diego, CA 09/2008 – 06/2014

Master of Science in Software Engineering

GPA: 3.6
